

GASSENSING
MAKING SENSE OF THE AIR WE BREATHE

GENie Ozone Analyzer Rental Guide

What's inside?

Each unit comes with:

- Ozone monitor
- Charging cord
- Tubing
- Calibration Certificate
- Case

How the Rental Works:

- You place the order via website or phone with credit card for weekly or monthly rental
- We ship device to your location using your preferred shipping carrier
- Rental period of 7 or 30 days begins when device arrives to your location
- Device is in use for 7 or 30 days (depending on rental period selected)
- Rental period ends when you ship device back using your preferred carrier
- When we receive the device we check over for proper operation, calibrate if necessary and get it ready for the next customer!

Quick Start Instructions:

- Download the user guide below (***GENie User Manual***)
- Ensure monitor is on a clean, flat surface
- Hold down the POWER switch for 5 seconds and then release
 - The unit will cycle through several screens, the calibration date will be the last before the main screen
- The unit will take 60 seconds to warm up
- When the Standby time elapses, the display will change to simply display the concentration as shown below. At this point the calibration gas is stable and you may proceed with calibration.

Trouble shooting the device:

To open the QR code, open up your cellular device on the camera app. Hover your camera over the QR code and it should scan the QR and bring you to the page you need. If it is not scanning, try tapping the screen on the code.
